

Care Services

Principal Supervising Social Worker

Child Action Northwest is an Independent Fostering Agency offering high quality foster care and supported lodgings placements in the North West of England.

Following a comprehensive service review, the management structure of the service has been strengthened, a key part of this process being the introduction of two Principal Supervising Social Worker posts – one based in the fostering team in Lancashire (office near Blackburn) the other being based in the fostering team in Greater Manchester (office in Bolton).

Both posts will offer the opportunity to gain line management and supervisory skills whilst retaining the ability to work with both foster families and supported lodgings host families and the young people using them.

The service is a dynamic one, constantly evolving and improving. In doing so, we are committed to looking after our staff teams, ensuring that they are well supported and resourced and involved in all aspects of service planning and development. Rated as 'good' by Ofsted, our aim is to achieve 'outstanding' in our next inspection. These posts will have a key role in helping us to achieve this objective.

If you can work at a fast pace with a managed workload in a creative and supportive modern environment, this could be the job that you are looking for.
